

GAUTAM BHARDWAJ

New Delhi, India | 8178365520 | gautambhardwaj261203@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with advanced Excel proficiency (pivot tables, complex formulas, VLOOKUP/SUMPRODUCT) and experience building automated reporting solutions and BI dashboards. Former Data Analyst Intern at an ad-tech platform, where I delivered daily/weekly MIS-style reports across 36+ data sources, audited 20-50 partner accounts for accuracy, and built performance dashboards (Looker Studio) and scorecards for stakeholders. Automated a manual reporting workflow, cutting turnaround by 70%+. Served as sole point of contact for a live external enterprise account. High attention to detail, comfortable managing multiple priorities, and a fast learner. MCA candidate (BCA foundation).

EXPERIENCE

Data Analyst Intern (Ad Operations) — [JustBaat Mediatech \(justbaat.ai\)](#)

Gurugram, Haryana | Jun 2026 – Aug 2026

- Designed and shipped a Revenue Analytics Dashboard (Google Sheets → Looker Studio) monitoring SSP/DSP revenue across multiple advertising partners — KPI cards, daily trend, monthly partner comparison, dynamic date filtering — delivered in 2 days on stakeholder request. [\[GitHub\]](#) [\[Live Dashboard\]](#)
- Diagnosed a demand-side performance gap by comparing endpoint-level revenue against request volume, isolating Banner formats as underperforming versus Video/CTV and recommending a QPS reallocation.
- Built an automated Python reporting solution for daily MIS-style revenue reports across 36+ live data sources, cutting manual reporting turnaround by 70%+.
- Own end-to-end data configuration and accuracy for 6+ external partner accounts (Limelight SSP platform: Adzim, Adstork, RTBYield, Auctera, Collectcent, Adcanny) — maintaining business rule sets (traffic quotas, floor pricing, inclusion/exclusion lists) at domain and bundle level.
- Sole point of contact for a live external enterprise account (Collectcent Digital Media): delivered 5 integrations live same-day, ran monthly data-quality/config review cycles with zero escalations.
- Audited 20-50 supply and demand partner accounts, producing color-coded Excel reports that flagged performance issues before they hit revenue.
- Rebuilt a manual VLOOKUP/SUMPRODUCT banner-inventory lookup in Python, scaling it to 54,000+ rows; built a companion tool converting SSP/DSP selector JSON files directly into structured Excel reports.
- Sourced and qualified B2B partners across international publishers, DSPs, and OTT platforms (Apollo.io, LinkedIn); built a COUNTIFS-based dashboard tracking leads across 4 pipeline stages, and trained a fellow intern end-to-end on the Limelight SSP platform.
- Built a formula-driven Google Sheets dashboard (SUMIF/QUERY) aggregating outreach data across 4 pipeline tabs into a single live view of mail sent, follow-ups, and deal status.

PROJECTS

Summer Analytics 2026 Capstone — Decarbonizing Travel — Python, LightGBM, Process Mining [\[GitHub\]](#)

- IIT Guwahati x Celonis program: process-mined 65,289 corporate travel trips (178,090 tonnes CO2e, \$140.5M spend) to identify emissions hotspots and deliver quantified Net-Zero-2030 policy recommendations.
- Engineered features from trip, event-log, and attribute data; built a predictive model (LightGBM classifier, 5-fold stratified CV) to flag high-carbon trips pre-booking, achieving ~0.999 ROC-AUC with no label leakage.

Digital Marketing Analysis — Python, Pandas, SQLite, Matplotlib, Looker Studio [\[GitHub\]](#) [\[Live Dashboard\]](#)

- Analyzed 30,000 rows of multi-platform digital marketing data (Meta, Google Search, TikTok, Snapchat, LinkedIn, Google Display) to compare ROI, CTR, CPM, and funnel conversion.
- Found Google Search generated ~6x more revenue than Meta (\$10.3M vs \$1.6M) and was the only platform with positive ROI (+284%).
- Built a live BI dashboard (Looker Studio) on the cleaned dataset with platform/placement/country/date filters and revenue, CPM, and ROI KPI cards/scorecards.

End-to-End E-Commerce Data Analysis (Olist Dataset) — Python, SQLite, Pandas, Seaborn [\[GitHub\]](#)

- Built a relational data model spanning 5 tables (orders, customers, products, sellers, payments) and wrote SQL queries (multi-table joins, subqueries, GROUP BY aggregations) against 95,126 orders (\$13.63M revenue) to answer 7 defined business questions on revenue trends, product categories, and payment methods.
- Found health_beauty as top revenue category and credit card as dominant payment method (~77% of value); built an interactive Power BI dashboard with KPI cards, trend, and category/payment breakdowns.

Global Cricket Analytics Dashboard — Excel, WPS [\[GitHub\]](#)

- Cleaned and modeled 50,000+ international cricket match records (2014–2026) into a structured relational format for analysis.
- Built an interactive Excel/WPS dashboard with pivot tables, slicers, and KPI cards to uncover team and player performance trends across formats.

TECHNICAL SKILLS

Excel: VLOOKUP, SUMPRODUCT, Pivot Tables, Data Cleaning & Validation

SQL: Joins, Subqueries, Aggregations (GROUP BY/ORDER BY), Query Writing Against Relational Data

Languages & Libraries: Python (Pandas, NumPy)

Data Analysis & ML: Statistical Analysis, Feature Engineering, LightGBM, Cross-Validation, Process Mining

BI & Reporting: Looker Studio (BI dashboarding), Google Sheets, Matplotlib, Seaborn, Power BI

AdTech / Programmatic: Limelight SSP, Endpoint & QPS Management, Bid Floors, SSP/DSP Operations

Databases: SQLite

Tools: Git, GitHub, VS Code, Jupyter Notebook

CERTIFICATIONS

- AI Appreciate Badge — CBSE and Intel (2026) [\[Show credential\]](#)
- Academic Process Mining Fundamentals — Celonis (2026) [\[Show credential\]](#)
- Introduction to Data Analysis Using Microsoft Excel — Coursera (2025) [\[Show credential\]](#)
- Summer Analytics 2026 (Data Science & Machine Learning) — IIT Guwahati [\[Show credential\]](#)

EDUCATION

Master of Computer Applications (MCA) — Jagannath Community College, Jagannath University (2025 – Present)

Bachelor of Computer Applications (BCA) — College of Architecture and Design, MDU (2022 – 2025)
